**Summary** — Enthusiastic full-stack developer with hands-on experience in building scalable web applications using Django, Laravel, Node.js, and React. Strong foundation in DSA and cybersecurity practices.

## Skills

- **Languages:** Python, PHP, Java, JavaScript, SQL
- **Frameworks:** Django, Laravel, Node.js, React, Next.js, Spring Boot
- **Databases:** MySQL, MongoDB
- **Cybersecurity:** OWASP Top 10, Burp Suite, Secure Coding, SQLi, XSS
- **Tools:** Postman, VS Code, Linux CLI, Git
- **Concepts:** RESTful APIs, MVC Architecture, JWT Auth, Agile, Microservices (intro)
- **DSA:** Arrays, Linked Lists, Trees, Graphs, Dynamic Programming, Searching, Sorting, Hashing

## Experience

### Netwin Infosolutions, Nashik

February 2024 – July 2024

*Software Engineer — Intern*

- Completed training in full stack web development with focus on core concepts and Django framework.
- Developed RESTful APIs and an admin panel for a ticketing system using Django and Django REST Framework.
- Enabled clients to raise service tickets and implemented backend logic to auto-assign technicians based on availability.
- Improved coordination between clients, managers, and technicians, with billing calculated based on service time.
- Worked as a backend developer for a client project and collaborated with the mobile app team to provide API support.

### Netwin Infosolutions, Nashik

August 2024 – Present

*Jr. Software Engineer*

- Received hands-on training in Laravel and transitioned into full-time development responsibilities.
- Continued development of the ticketing system by integrating synchronization with the client's pre-existing service.
- Built backend functionality to sync tickets and activities between platforms, enabling real-time data consistency.
- Contributed to a multi-tenant clothing eCommerce platform, working on both admin and user-facing modules.
- Developed features to register vertical-specific stores with individual domains and separate product catalogs.
- Enabled logo customization for products, allowing multiple logo options, positioning control, and user selection during checkout.
- Implemented admin-side controls for managing vertical-specific product data and customizations.
- Maintained documentation for IT policies and procedures
- Currently working on a legacy Laravel project, enhancing core modules and integrating new features based on client needs.

## Education

### R. C. Patel Institute of Technology, Shirpur

*Bachelor of Technology in Computer Engineering*

## Certifications

### Google Cybersecurity Professional Certificate

[View Credential](#)

- Completed a comprehensive program covering network security, system security, threat modeling, and incident response.
- Gained hands-on experience with tools like Wireshark, SQL, Linux command line, and SIEM systems.

## Projects

### Portfolio Website using React

[View Demo](#)

- Created a personal portfolio site using HTML, CSS, and React for the front-end.
- Showcased resume, technical skills, and project work with a responsive layout and interactive design.

### Laptop Shopping Webapp using MERN Stack

- Built an online laptop shopping platform using React.js (frontend), Node.js and Express.js (backend), and MongoDB (database).
- Designed and implemented RESTful APIs for user management, product catalog, and shopping cart features.
- Created an interactive UI with dynamic routing, state management, and responsive design.

### Digital Wallet System using Spring Boot and React

- Built a full-stack digital wallet application using Spring Boot for backend and React for frontend.
- Implemented user authentication, wallet balance management, and secure money transfer between users.
- Designed transaction history and activity tracking for each user to ensure transparency.
